

Job Announcement: **Guided Therapy Systems,  
Mesa, Arizona**

Guided Therapy Systems recently contacted the MCC Electronics Program and is seeking a student who meets the following qualifications:

"We have an immediate requirement for an engineering/computer savvy student to work on a sizable stack of imaging data in our lab...

We need somebody who knows PC, Windows, and MS-Office and who is willing to do precise (and repeating) image processing work using a specialized software. Required training will be provided. ...

The person's time schedule is flexible as long as he/she can invest 15-40 hours per week. Wages will be on an hourly basis. We hope to support this person for at least two months (possibly much longer).

The work is quite interesting but straightforward...we need individuals who are diligent and precise. Further details about our group can be had at [www.guidedtherapy.com](http://www.guidedtherapy.com) or [www.ulthera.com](http://www.ulthera.com)

Inder Makin, MD, PhD  
VP Clinical and Application Development  
Guided Therapy Systems
